VOLUNTEER EXPERIENCE

Event Volunteer, Danube Sports World | Danube Community Event

- Supported event operations and provided on-site guest assistance.
- Ran entertainment activities and games for guests as part of a team.

PROJECTS

Village Vet LLC Website | Web Developer | Group Project for a Real Client

- Collaborated with a team to build a website for a real veterinary clinic.
- Acted on client feedback to improve navigation, information hierarchy and accessibility.
- Applied CSS, typography, colour and layout principles to present information clearly.
- Awarded a project certificate for successful completion of the client-based project.

Harry Potter Data-Driven Application | Web Developer | Individual Project

- Built an interactive web app that retrieves and displays live Harry Potter API data using JavaScript.
- Turned raw API data into a clean, user-friendly interface.

Smartphone App Prototype | UX/UI Designer | Individual Project

- Designed an interactive app prototype from initial ideation through user flows to final interface design.
- Applied UX principles, visual hierarchy, typography, spacing and navigation to improve usability.

Multi-Device Application | Application Developer | Individual Project

- Developed a responsive application that delivers a consistent experience across multiple devices.
- Built adaptive layouts and tested across different screen sizes to improve usability.

Responsive Website | Front-End Developer | Individual Project

- Designed and developed a responsive website with interactive features and structured navigation.
- Prioritised usability, visual consistency and functional implementation.
